Art Unit: 1623

Claims 11-12 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The terminology "R is a residual group after removal of an SH group from an amino acid containing an SH group or a peptide containing an amino group containing an SH group" (claims 11-12) was not described in the specification in such a way as to reasonably convey to one skilled in the art as to which specific groups are encompassed by said terminology. The specification fails to provide any description or guidance in order to determine which groups were contemplated by the inventor at the time of the present invention.

Claims 11, 12 and 27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear what is encompassed by the terminology "R is a residual group after removal of an SH group from an amino acid containing an SH group or a peptide containing an amino acid containing an SH group" (claims 11 and 12). It is not clear what exactly is represented by the variable "R" i.e. the scope of the invention cannot be determined.

Claims 11 and 12 are substantial duplicates. Note that claim 12 encompasses nothing more than compounds of claim 11.

Art Unit: 1623

In claim 27, the terminology “,3-dioxolane” should be “-1,3-dioxolane” as set forth in claims 11-12.
